EXPERIENCE

RubyEffect Software Solutions Pvt. Ltd.

Junior Software Engineer (January 2016 - Present)

- Provided continued maintenance and development of existing web applications.
- I was one of the developers who started building an In-house project developed in Rails.
- Along with the team and under the guidance of my Manager, I had implemented many features and added enhancements to compete with market standards.

Freelance Web developer

(May 2015 - December 2015)

- I opted to be a freelancer during my college days for six months to gain working knowledge on client requirements.
- I tired hard for convincing and getting small projects from local business people.
- I had built websites for their business improving their market in the city.
